MODERN CHARGING TECHNOLOGY

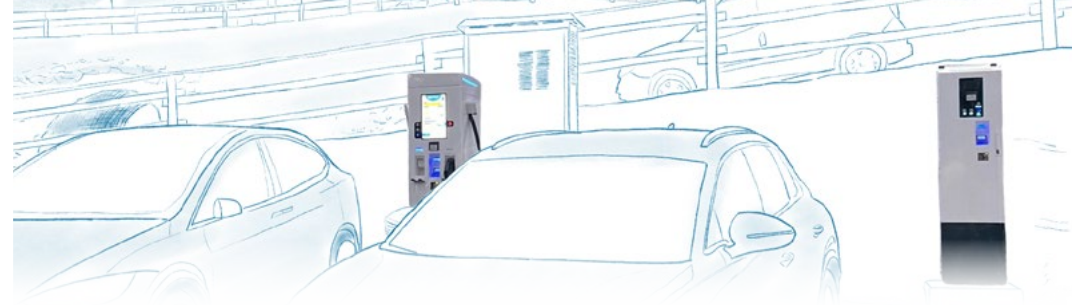

PLUG & CHARGE

RELIABLE

POWERFUL

DIRECT PAYMENT VIA
CREDIT CARD TERMINAL

www.enercharge.at

EnerCharge is among the technological market leaders in charging technology, parking space management and the inclusion of a multitude of payment options. It is part of the established AAE-group which can look back on 135 years of experience in network technology, electricity supply and energy management. This is how we command specialised know-how in the development of ideally attuned hardware and software solutions.

The high-end and innovative products are developed and produced in Austria. We offer a product range for all types of electric vehicles that meets the most modern requirements. The chargers have a robust finish, are equipped with user-friendly software and allow real direct payment via debit- or credit card.
